

The **Catholic University of Lyon (UCLy)** is a private university with more than 8800 students, recognized by the french state and member of the « Université de Lyon » network. It is organized in 5 faculties (sciences, law, humanities and

languages, philosophy and human sciences, theology) and 20 training and research units, with among other **the Interdisciplinary Center in Ethics (CIE) that is strongly committed to bioethical questions.**

In relationship with the Interdisciplinary Center in Ethics, that is part of the Faculty of Philosophy, and with the Faculty of Sciences, **the research group « Epistemology and ethics of sciences and technologies »** explores the following research fields

### ***Its role in the MetaGenoPolis project:***

- ➔ Development of the ethical problematic directly with the scientists, industrials and users
- ➔ Research work for an ethic of life sciences under construction
- ➔ Study of the societal impact and ethical choices
- ➔ Training in ethics

## The resources at the disposal of the research group

### A multidisciplinary group

► Scientists, philosophers, epistemologists, in relationship with innovation managers

### A resource center on the ethical questions raised by the new technologies of the living

► In direct cooperation with scientists and industrial companies interested (participation to contracts, networks, ethical committees, colloquiums, trainings...)

### A research space

► For debating and managing innovation while respecting law and ethics

### Outstanding partners

► Analysis of the impact of biotechnologies in society in relationship with the « society and sciences » cluster from the University of Lyon, the UNESCO ethical committee and the Synthetic biology Observatory

### A direct link with trainings in biology, biochemistry, biotechnologies

► Bachelor degree « Life sciences and humanities »  
 ► Master « Biobank »  
 ► Master « R&D Biotech' » of UCLy
